Mohd Ashkan Khan

ashkankhan728@gmail.com | +91-7906649538 | Portfolio | LinkedIn | GitHub | LeetCode

Technical Skills

Languages & Tools: JavaScript, TypeScript, Java, Python, C, C#, HTML, CSS
Frameworks & Libraries: React.js, Next.js, Node.js, Express.js, Tensorflow, Flask, TailwindCSS, WebSockets, Redux
Databases: MongoDB, MySQL, ConvexDB | **Version Control:** Git, GitHub

Professional Experience

Full Stack Developer Intern: *Finsocial Digital Systems, Remote* — Dec 2024 - Jan 2025

- Developed responsive user interfaces with React.js and TailwindCSS, and built RESTful APIs using Node.js and Express.js for seamless backend communication and authentication.
- Collaborated in an Agile environment, contributing to sprint meetings and code reviews to maintain clean, scalable code.

Software Engineer Intern: *Techpro Compsoft, Noida* — July 2024 - August 2024

- Gained hands-on experience in software development practices while building REST APIs using C# and .NET to enhance functionality and data interaction.
- Strengthened proficiency in ReactJS and C#, contributing to both frontend and backend development tasks.

Projects

NeuroChest – Multi-label Chest X-ray Diagnosis System — *GitHub*
Python · Tensorflow · Flask · React.js · TailwindCSS

- Built an ensemble deep learning model using VGG16, VGG19, DenseNet121, and ResNet50 to classify 14 chest pathologies from X-ray images.
- Trained on the CheXpert dataset (230K+ images), applied optimal thresholds for label-wise probability-to-binary conversion, and achieved 87.41% accuracy and 0.7855 AUC.
- Developed a fully responsive frontend enabling X-ray uploads and returning model-based diagnoses with confidence scores.

SpeakUp – Anonymous Workplace Reporting Platform — *Live | GitHub*
Next.js · TypeScript · TailwindCSS · ShadCN UI · NextAuth · ConvexDB

- Developed a secure, anonymous web platform that allows employees & students to report workplace incidents without revealing their identity, fostering a safer and more inclusive organizational culture.
- Integrated secure authentication with Google and GitHub via NextAuth, and Convex for real-time data and secure, serverless backend.
- Implemented role-based access to allow organization admins to view and respond to incident reports, while maintaining strict privacy controls.

DocuFlow – Collaborative Document & Whiteboard App — *Live | GitHub*
Next.js · TypeScript · TailwindCSS · ShadCN UI · Kinde Auth · ConvexDB

- Developed a full-stack document collaboration platform inspired by Eraser.io, allowing users to write, draw, and manage documents in a structured workspace.
- Implemented rich-text editing with Editor.js and collaborative whiteboard drawings using Tldraw, with a responsive UI using ShadCN and TailwindCSS with support for light/dark mode.
- Integrated Kinde authentication for secure user login and role-based access to team workspaces, and ConvexDB for serverless real-time querying and CRUD operations for documents and team management.

Education

Bipin Tripathi Kumaon Institute of Technology - Dwarahat — Aug 2021 – Present
Bachelor of Technology - Computer Science and Engineering

K.V.M. Public School - Haldwani — May 2021
Senior Secondary — Percentage - 94%

Achievements

- Qualified **GATE 2025** in Computer Science & Engineering.
- Solved **270+** problems on LeetCode, covering Data Structures and Algorithms.
